500friends API Tasks

For the following tasks, please compose an API URL based on the documentation you received. Some information you'll need:

1. Your UUID is:

    `GwMlFcW6sZaOQwR`

2. Your secret key is:

    `81XrhmOcZngLRy7zXnvE36QHtNShdSGY`

3. You will be using our staging server. So the base for your URLs will be:

    `http://loyalty-stage.500friends.com`

    (not `http://loyalty.500friends.com` as in the documentation).

4. The enroll and record calls do not require a security signature, but the customer/show call does.

5. You may omit any parameters that are not mentioned in the task and are not required by the API end point.

6. Feel free to run the URLs via a browser to check your work.

Tasks

1. Enroll a member into the program. You may use any email address you wish (a fake one is fine). Set the enrollment channel to "web" (no quotes).

2. Record a purchase of $125 for your enrolled user.

3. Get the customer information for your enrolled user.
